EDUCATION

Architectural Association School of Architecture *Sept. 2024 – March 2026*
Master of Architecture | Architecture and Urbanism (DRL) *London, UK*

Spyropoulos Studio | Researched **architectural agency** by fabricating **self-assembling robots** with AI decision-making and machine vision. Simulated collective spatial construction/deformation in Unity, Isaac Lab, Grasshopper.

Technical Workshops | *InterActive Wireframes*: Piano-wire forming + Arduino-based interactive structure development.
Pattern Machine: C# + Unity for performative 3D form development.
Resilient Connections: Wooden joinery fabrication + Grasshopper-based aggregation simulation.

Chang'an University (Project 211) *Sept. 2016 – July 2021*
Bachelor of Architecture | Architectural Design (5-year programme) *Shaanxi, China*

Core Courses | Graduation Project (A, Distinction), Architectural Design (93),
Practice in Design Institute (94), Ancient Architecture Measuring (91).

PROFESSIONAL EXPERIENCE

Minimaforms *July 2026 – Present*
Collaborative Designer *London, UK*

Competition | Contributed to concept design discussions. Took **primary** responsibility for design development modelling and plan drawing for an existing-building regeneration project. Independently produced **all** analytical diagrams covering design rationale, functional organisation and the translation of design metrics.

Hainan Provincial Design & Research Institute Co., Ltd *May 2023 – Feb. 2024*
Provincial, Grade-A Certified Architectural Design Firm | Architectural Assistant *Hainan, China*

AI Development | **Proposed an AI-assisted workflow** using ComfyUI and Stable Diffusion, liaised with clients on stylistic options, and secured the selection of three proposals for further modelling.

Architectural Design | Contributed to concept design and spatial coordination, including design development modelling, technical drawing coordination following structural review, and architectural visualisation. Designed and coordinated **20+ architectural units and multiple masterplans**, contributing to approvals and delivery across **10+ projects** in residential, university campus, commercial, and urban regeneration sectors.

Technical Delivery | Produced and revised **30+ technical drawings**. Adjusted plan layouts to meet daylight and green space ratio requirements, and revised floor-to-floor heights and beam/column dimensions and positions in response to multidisciplinary feedback.

Shenzhen Huahui Design Co., Ltd *Aug. – Oct. 2021*
Grade-A Certified Architectural Design Firm | Architectural Intern *Guangdong, China*

Project & Delivery | Contributed to a winning entry in **1 public competition** and the delivery of **3 commissioned projects**, preparing design documentation, presentation materials and project booklets.

Design Studies | Produced **7 architectural typology studies** and **3 urban regeneration masterplan sketches**. Assisted in producing **3+ sets of technical drawings**, including junction details and elevation material zoning.

Design Optimisation | Adjusted and verified design metrics in Excel against regulatory limits, refining floor plans to generate multiple layout options for review by the project lead.

Coordination | Prepared digital model assets at varying levels of detail for the visualisation and physical model teams.

AWARDS & PUBLICATIONS

Distinction Graduation Project - National Transportation Architecture Joint Graduation Design *June 2021*
Tied for the Second Prize (the first prize vacant) - 2020 Future Community International Design *Oct. 2020*
Third Prize - Zhongshan OCT Happy Coast Centre Green Axis Public Space Design Competition *Sept. 2021*
Masterpiece Award - UA Creation Award & International Concept Design Competition *Dec. 2018*
Published Paper - The 3rd National Architectural Review Symposium Conference *Nov. 2019*

LANGUAGES & SOFTWARE SKILLS

Languages | English (academic), Mandarin Chinese (native), Hainanese (near native), Cantonese (listening)
Software Skills | Rhino, Grasshopper, SketchUp, AutoCAD (TZ), V-Ray, Enscape, D5 Render, Photoshop, Illustrator, InDesign (Primary);
C#/Python for Unity, Visual Studio, VS Code, Codex, Anaconda Prompt, CloudCompare, Premiere Pro (Secondary).
